

Benoît H. Dicaire
CISM, CISSP-ISSAP, ISSMP, PMP

Who are you? Who am I?

For most people, these questions of identity are relatively straightforward. But for your organization the issue probably runs much deeper. Because there's more at risk when sensitive information abounds, identity can't be taken for granted.

Information security (InfoSec) isn't a product, it's a process. As an InfoSec strategist, I guide national and international companies through the process of implementing business innovations while keeping operations cost-effective.

Professionally Speaking!

WHO IS BENOÎT H. DICAIRE?

Benoît H. Dicaire is a Certified Information Systems Security Professional (CISSP) with nearly two decades of experience protecting information and defending security for organizations in Canada and around the world.

A high achiever with the right approach, Benoît has received professional recognition and several corporate awards for his exceptional organizational and leadership skills.

Benoît is also a Certified Information Security Manager (CISM), a Certified Information Systems Auditor (CISA), a Project Management Professional (PMP), and holds certifications from COMPTIA, ISSEA and the Worldwide Association of Business Coaches.

THE ADVISOR

As a trusted advisor, Benoît has helped many organizations align their InfoSec practices with business strategies and government regulations. Experienced in every step of the InfoSec process, today Benoît focuses his work on Security Posture Assessment, Identification of Best Practices, and Enterprise Architecture.

With business and management as his priorities, Benoît successfully tackles high-profile projects where confidentiality, integrity, and availability are not just options.

THE SPEAKER

Benoît is also known as an excellent and adaptable speaker and writer who tailors content to the needs of his audience. Over the past few years, Benoît's talks and presentations have attracted a great deal of attention from within the Canadian InfoSec field.

His presentations, available in French and in English, will show you how to most effectively use resources to obtain strategic security. The Montréal-based speaker is available to travel. Please contact him, he'll be glad to help!
